User Acceptance Testing (UAT) Template

Date	2 October 2026
Team ID	SWTID-2026-4524
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Team Leader: Swathi R | Team Members: Sandhiya D, Sandhya Charlet Calista S, Mallemkonda Dallyjasmine | Team Size: 4

Project Overview:

Project Name: Implement Client Script & UI Policy (Incident)

Project Description: A ServiceNow project that uses a UI Policy and Client Scripts (onChange, onSubmit, onCellEdit) to enforce data rules on Incident records, such as mandatory fields, read-only fields, automatic updates and save validation.

Project Version: 1.0

Testing Period: 2 October 2026 to 2 October 2026

Testing Scope:

Features and functionalities to be tested:

- UI Policy "High Impact Control" on the Incident table: Assignment group mandatory when Impact is 1 – High, with Reverse if false
- UI Policy Action: Urgency read-only when Impact is High
- onChange Client Script: Urgency set to High automatically with an info message
- onSubmit Client Script: save blocked when Impact is High and Assigned To is empty
- onCellEdit Client Script: State edits blocked in the Incident list view
- Form-based State update still allowed

User stories or requirements to be tested:

- USN-1 to USN-4: UI Policy and UI Policy Action
- USN-5: onChange Client Script
- USN-6: onSubmit Client Script (save validation)
- USN-7: onCellEdit Client Script
- USN-8: Form-based State update
- USN-9: Testing of all rules

Testing Environment:

URL/Location: ServiceNow instance, Incident module (Incident → Create New and Incident → All)

Credentials (if required): Administrator or ITIL user account of the instance (shared separately with the tester)

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Assignment group becomes mandatory when Impact is High	1. Go to Incident → Create New 2. Set Impact to 1 – High 3. Check the Assignment group field	Assignment group is shown as mandatory	Assignment group was mandatory	Pass
TC-002	Urgency becomes read-only when Impact is High	1. Open a new Incident 2. Set Impact to 1 – High 3. Try to change the Urgency field	Urgency is visible but read-only	Urgency was read-only	Pass
TC-003	Urgency is set automatically (onChange)	1. Open a new Incident 2. Change Impact to 1 – High	Urgency changes to 1 – High and the message "Urgency set to High for High impact incident." appears	Urgency changed to High and the message appeared	Pass
TC-004	Save blocked when Assigned To is empty (negative test)	1. Create a new Incident with Impact = High 2. Leave Assigned To empty 3. Click Submit	Incident is not saved and the error "Assigned To is mandatory for High impact incidents." is shown	Save was blocked and the error was shown	Pass
TC-005	Successful save when Assigned To is filled	1. Create a new Incident with Impact = High 2. Select a user in Assigned To 3. Click Submit	Incident is saved successfully without errors	Incident was saved	Pass
TC-006	Reverse condition: Impact changed from High to Medium	1. Open an existing Incident with Impact = High 2. Change Impact to Medium 3. Check Assignment group, Assigned To and Urgency	Fields are no longer mandatory and Urgency is editable again	Fields were no longer mandatory and Urgency was editable	Pass
TC-007	Save after the reverse condition	1. Continue from TC-006 2. Click Update	Record is saved successfully without errors	Record was saved	Pass
TC-008	State edit blocked in list view (negative test)	1. Go to Incident → All 2. Double-click the State field of any Incident 3. Try to change the value	An alert says State cannot be updated using list editing and the value stays unchanged	Alert appeared and State was unchanged	Pass
TC-009	State update from the Incident form	1. Open the same Incident record 2. Change State to a new value 3. Click Update	State change is saved and other rules still work	State was saved	Pass
TC-010	Lower impact does not need Assigned To (negative scenario)	1. Create a new Incident with Impact = Medium 2. Leave Assigned To empty 3. Click Submit	Incident is saved without the Assigned To error	Incident was saved without error	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
–	No bugs were found during this UAT run	–	–	–	All 10 test cases passed

Sign-off:

Tester Name: Swathi R (Team Leader)

Date: 2 October 2026

Signature: _____

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
